J62C

CONTENTS OF VOLUME 47

NUMBER 1, SEPTEMBER, 1963

1 KARAKASHIAN, MARLENE W., and HASTINGS, J. WOODLAND. The effects of inhibitors of macromolecular biosynthesis upon the persistent rhythm of luminescence in *Gonyaulax*

13 DE VOE, ROBERT D. Linear relations between stimulus amplitudes and amplitudes of retinal action potentials from the eye of the wolf spider

33 CRESCITELLI, FREDERICK. The photosensitive retinal pigment system of *Gekko gekko*

53 STANDAERT, FRANK G. Post-tetanic repetitive activity in the cat soleus nerve. Its origin, course, and mechanism of generation

71 SHIBUYA, TATSUAKI, and TAKAGI, SADAYUKI F. Electrical response and growth of olfactory cilia of the olfactory epithelium of the newt in water and on land

83 RAY, PETER M., and RUESINK, ALBERT W. Osmotic behavior of oat coleoptile tissue in relation to growth

103 KAPLAN, J. GORDIN. The reversion of catalase during growth of yeast in anaerobiosis

117 MULLINS, L. J., and NODA, K. The influence of sodium-free solutions on the membrane potential of frog muscle fibers

133 IRWIN, RICHARD L., and HEIN, MANFRED M. Contracture of slow striated muscle during calcium deprivation

151 FEINSTEIN, MAURICE B. Inhibition of caffeine rigor and radiocalcium movements by local anesthetics in frog sartorius muscle

173 WEISS, GEORGE B., and HURWITZ, LEON. Physiological evidence for multiple calcium sites in smooth muscle

189 GIRARDIER, LUCIEN, REUBEN, JOHN P., BRANDT, PHILIP W., and GRUNDFEST, HARRY. Evidence for anion-permselective membrane in crayfish muscle fibers and its possible role in excitation-contraction coupling

NUMBER 2, NOVEMBER, 1963

215 MATTHEWS, ROWENA G., HUBBARD, RUTH, BROWN, PAUL K., and WALD, GEORGE. Tautomeric forms of metarhodopsin

241 HARA, REIKO. Changes in electrical conductance of rhodopsin on photolysis

265 ALPERN, MATHEW, MCCREADY, DONALD W., JR., and BARR, LLOYD. The dependence of the photopupil response on flash duration and intensity

279 CABRERA-JUÁREZ, EMILIANO. Nitrous acid reactivation of ultraviolet-irradiated transforming DNA from *Haemophilus influenzae*

297 RADOVICH, JEVROSIMA, SZENTIVANYI, ANDOR, and TALMAGE, DAVID W. The

Alma College Library
Alma, Michigan

lack of selective reincorporation into tissue protein of the amino acids derived from the catabolism of serum protein

315 MILSTONE, J. H., OULIANOFF, N., and MILSTONE, V. K. Outstanding characteristics of thrombokinase isolated from bovine plasma

329 SCHULTZ, STANLEY G., EPSTEIN, WOLFGANG, and SOLOMON, A. K. Cation transport in *Escherichia coli*. IV. Kinetics of net K uptake

347 MAZUR, PETER. Kinetics of water loss from cells at subzero temperatures and the likelihood of intracellular freezing

371 SCHMIDT, ROBERT S. Independence of the endovestibular potential in homeotherms

379 KIMIZUKA, H., and KOKETSU, K. Changes in the membrane permeability of frog's sartorius muscle fibers in Ca-free EDTA solution

393 ZADUNAISKY, JOSÉ A., CANDIA, OSCAR A., and CHIARANDINI, DANTE J. The origin of the short-circuit current in the isolated skin of the South American frog *Leptodactylus ocellatus*

403 GINZBURG, B. Z., and KATCHALSKY, A. The frictional coefficients of the flows of non-electrolytes through artificial membranes

NUMBER 3, JANUARY, 1964

419 MCDOUGAL, D. B., JR., SCHIMKE, ROBERT T., JONES, ELIZABETH M., and TOUHILL, ELIZABETH. Quantitative studies of white matter. II. Enzymes involved in triose phosphate metabolism

433 GOLDSMITH, TIMOTHY H., and WARNER, LANA T. Vitamin A in the vision of insects

443 FUORTES, M. G. F., and YEANDLE, S. Probability of occurrence of discrete potential waves in the eye of *Limulus*

465 BERNHARD, C. G., and OTTOSON, D. Quantitative studies on pigment migration and light sensitivity in the compound eye at different light intensities

479 TATEDA, HIDEKI, and BEIDLER, LLOYD M. The receptor potential of the taste cell of the rat

487 MELLON, DEFOREST, JR., and KENNEDY, DONALD. Impulse origin and propagation in a bipolar sensory neuron

501 CARMELIET, E. E. Influence of lithium ions on the transmembrane potential and cation content of cardiac cells

531 PAGE, ERNEST, GOERKE, R. J., and STORM, S. R. Cat heart muscle *in vitro*. IV. Inhibition of transport in quiescent muscles

545 FINKELSTEIN, ALAN. Electrical excitability of isolated frog skin and toad bladder

567 SCHULTZ, STANLEY G., and ZALUSKY, RALPH. Ion transport in isolated rabbit ileum. I. Short-circuit current and Na fluxes

585 LEFEVRE, PAUL G. The osmotically functional water content of the human erythrocyte

NUMBER 4, MARCH, 1964

605 SJODIN, R. A., and HENDERSON, E. G. Tracer and non-tracer potassium fluxes in frog sartorius muscle and the kinetics of net potassium movement

639 IRWIN, RICHARD L., and HEIN, MANFRED M. Contracture coupling of slow striated muscle in non-ionic solutions and replacement of calcium, sodium, and potassium

651 DENNISON, DAVID S. The effect of light on the geotropic responses of *Phycomyces* sporangiophores

667 VARGAS, FERNANDO, and JOHNSON, JOHN A. An estimate of reflection coefficients for rabbit heart capillaries

679 WILLIAMS, T. P. Photoreversal of rhodopsin bleaching

691 KANDEL, E. R. Electrical properties of hypothalamic neuroendocrine cells

719 HERZOG, W. H., FEIBEL, R. M., and BRYANT, S. H. The effect of aconitine on the giant axon of the squid

735 DURBIN, RICHARD P. Anion requirements for gastric acid secretion

749 LINDLEY, BARRY D., and HOSHIKO, T. The effects of alkali metal cations and common anions on the frog skin potential

773 LINDLEY, BARRY D., HOSHIKO, T., and LEB, D. E. Effects of D_2O and of osmotic gradients on potential and resistance of the isolated frog skin

795 WHITTEMBURY, GUILLERMO. Electrical potential profile of the toad skin epithelium

NUMBER 5, MAY, 1964

809 VON BÉKÉSY, GEORG. Rhythmical variations accompanying gustatory stimulation observed by means of localization phenomena

827 JOHNSON, S. L., AND WOODBURY, J. W. Membrane resistance of human red cells

839 BARTON, T. C., and BROWN, D. A. J. Water permeability of the fetal erythrocyte

851 CARTER, MELVIN W., MATRONE GENNARD, and MENDENHALL, W. Estimation of the life span of red blood cells

859 MACROBBIE, ENID A. C. Factors affecting the fluxes of potassium and chloride ions in *Nitella translucens*

879 CEREIJIDO, MARCELINO, HERRERA, FRANCISCO C., FLANIGAN, WILLIAM J., and CURRAN, PETER F. The influence of Na concentration on Na transport across frog skin

895 SPERELAKIS, NICK, and LEHMKUHL, D. Effect of current on transmembrane potentials in cultured chick heart cells

929 FREYGANG, W. H., JR., GOLDSTEIN, D. A., and HELLAM, D. C. The after-potential that follows trains of impulses in frog muscle fibers

953 CURTIS, BRIAN A. The recovery of contractile ability following a contracture in skeletal muscle

965 NARAHASHI, TOSHIO, MOORE, JOHN W., and SCOTT, WILLIAM R. Tetrodotoxin blockage of sodium conductance increase in lobster giant axons

975 KISHIMOTO, UICHIRO, and ADELMAN, WILLIAM J., JR. Effect of detergent on electrical properties of squid axon membrane

987 STANDAERT, FRANK G. The mechanisms of post-tetanic potentiation in cat soleus and gastrocnemius muscles

1003 NAKA, KEN-ICHI. Electrophysiology of the fetal spinal cord. I. Action potentials of the motoneuron

1023 NAKA, KEN-ICHI. Electrophysiology of the fetal spinal cord. II. Interaction among peripheral inputs and recurrent inhibition

1039 LETTERS TO THE EDITOR

NUMBER 6, JULY, 1964

1043 SCHULTZ, STANLEY G., and ZALUSKY, RALPH. Ion transport in isolated rabbit ileum. II. The interaction between active sodium and active sugar transport

1061 KIRSCHNER, LEONARD B., and BARKER, JENNIFER. Turnover of phosphatidic acid and sodium extrusion from mammalian erythrocytes

1079 FUJINO, MASAHIRO, and FUJINO, SUMIKO. Selective inhibition of potassium contracture in presence of intact twitch

1089 CONE, RICHARD A. The rat electroretinogram. I. Contrasting effects of adaptation on the amplitude and latency of the b-wave

1107 CONE, RICHARD A. The rat electroretinogram. II. Bloch's law and the latency mechanism of the b-wave

1117 HOSKIN, F. C. G., and ROSENBERG, PHILIP. Alteration of acetylcholine penetration into, and effects on, venom-treated squid axons by physostigmine and related compounds

1129 PAGE, ERNEST, and BERNSTEIN, R. S. Cat heart muscle *in vitro*. V. Diffusion through a sheet of right ventricle

1141 REUBEN, JOHN P., GIRARDIER, LUCIEN, and GRUNDFEST, HARRY. Water transfer and cell structure in isolated crayfish muscle fibers

1175 GIEBISCH, GERHARD, KLOSE, RUTH M., MALNIC, GERHARD, SULLIVAN, W. JAMES, and WINDHAGER, ERICH E. Sodium movement across single perfused proximal tubules of rat kidneys

1195 GARCÍA ROMEU, F., and MAETZ, J. The mechanism of sodium and chloride uptake by the gills of a fresh-water fish, *Carassius auratus*. I. Evidence for an independent uptake of sodium and chloride ions

1209 MAETZ, J., AND GARCÍA ROMEU, F. The mechanism of sodium and chloride uptake by the gills of a fresh-water fish, *Carassius auratus*. II. Evidence for NH_4^+/Na^+ and HCO_3^-/Cl^- exchanges

1229 SPRINGER, GEORG F., and HORTON, RICHARD E. Erythrocyte sensitization by blood group–specific bacterial antigens

1255 INDEX TO VOLUME 47

W. J. V. OSTERHOUT

1871–1964

Professor W. J. V. Osterhout died on April 9, 1964, aged 92 years, following a long illness. After serving on the faculties of the University of California, and of Harvard University, he became a Member of The Rockefeller Institute in 1925, succeeding Jacques Loeb as head of the Division of General Physiology. Professor Osterhout had been an Editor of *The Journal of General Physiology* since its founding over 45 years ago. This is almost surely a record in the history of scientific periodicals. For many years the *Journal* served as the principal place of publication for Osterhout's large number of papers in the fields of cellular permeability, electrical resistance, bioelectric potentials, and respiration. His influence upon students, colleagues, and the biological audience in general was exerted toward quantitative data and mathematical analysis of biological processes. His place is assured as one of the chief founders of general physiology in the United States.

LETTERS TO THE EDITOR

Brief letters to the Editor that make specific scientific reference to papers published previously in *The Journal of General Physiology* are invited. Receipt of such letters will be acknowledged, and those containing pertinent scientific comments and scientific criticisms will be published.
